STATEMENT OF SUBSTANCE OF INTERVIEW

DOCKET No. RUW-101

Sir:

On November 16, 2006, a telephonic interview was held with Examiner Susan McCormick Ewoldt and her Supervisor, Christopher R. Tate. The rejections of record were discussed and Applicant's representative indicated that using molecularly distilled omega-3 fish oils in the composition is critical and that the prior art of record does not teach using molecularly distilled omega-3 fish oils along with the other recited ingredients within a composition effective for soothing traumatic conditions of the skin such as claimed.

The Examiners suggested that the independent claims be reworded in element (a) as —molecularly distilled omega-3 fish oils—as well as appropriately amending these claims and dependent claims. Applicant's representative also agreed to insert the term —effective—after the word “composition” in line 1 of each independent claim so as to distinguish the claimed invention with more clarity. As written, the independent claims included the terms, “the composition being active against traumatic conditions of the skin”, but it was after element (d).

The amendments to Applicant's claims as described above have been merely made to provide further clarity to Applicant's unique and non-obvious features and in no way are intended to narrow the scope of any of Applicant's claims.

Applicant has complied with all of the Examiners' requirements according to the interview with Examiner Beth McCormick Ewoldt and her Supervisor Christopher R. Tate on November 16, 2006 when agreement was reached that with these amendments to Applicant's claims would put this application in condition for allowance. Applicant thanks both Examiner Beth McCormick Ewoldt and her Supervisor Christopher R. Tate for their courtesy
